Information, Entropy and Their Geometric Structures
This book is a reprint of the special issue that appeared in the online open access journal *Entropy* (ISSN 1099-4300) in 2015 (available at: http://www.mdpi.com/journal/entropy/special_issues/entropy-Geome).

**Guest Editors**
Frédéric Barbaresco
Advanced Radar Concepts Business Unit
Thales Air Systems S.A., Voie Pierre-Gilles de Gennes F91470 Limours
France

Ali Mohammad-Djafari
Laboratoire des Signaux et Systèmes
UMR 8506 CNRS-Supelec-Univ Paris Sud,
Gif-sur-Yvette
France

**Editorial Office**
MDPI AG
Klybeckstrasse 64
Basel, Switzerland

**Publisher**
Shu-Kun Lin

**Managing Editor**
Jely He

1. **Edition 2015**

# Table of Contents

List of Contributors ....................................................................................................................... VII

Preface
From Information Theory to Geometric Science of Information...................................................... IX

Chapter 1

Stefano Bordoni
J.J. Thomson and Duhem’s Lagrangian Approaches to Thermodynamics
Reprinted from: *Entropy* 2014, 16(11), 5876-5890
http://www.mdpi.com/1099-4300/16/11/5876 ........................................................................... 1

Olivier Rioul and José Carlos Magossi
On Shannon’s Formula and Hartley’s Rule: Beyond the Mathematical Coincidence
Reprinted from: *Entropy* 2014, 16(9), 4892-4910
http://www.mdpi.com/1099-4300/16/9/4892 ............................................................................. 16

Chapter 2

Misha Gromov
Symmetry, Probability, Entropy: Synopsis of the Lecture at MAXENT 2014
Reprinted from: *Entropy* 2015, 17(3), 1273-1277

Pierre Baudot and Daniel Bennequin
The Homological Nature of Entropy
Reprinted from: *Entropy* 2015, 17(5), 3253-3318
http://www.mdpi.com/1099-4300/17/5/3253 ............................................................................... 39

Nina Miolane and Xavier Pennec
Computing Bi-Invariant Pseudo-Metrics on Lie Groups for Consistent Statistics
Reprinted from: *Entropy* 2015, 17(4), 1850-1881
Chapter 3

Ali Mohammad-Djafari
Entropy, Information Theory, Information Geometry and Bayesian Inference in Data, Signal and Image Processing and Inverse Problems
Reprinted from: Entropy 2015, 17(6), 3989-4027
http://www.mdpi.com/1099-4300/17/6/3989 ............................................................................ 235

Jérémy Bensadon
Black-Box Optimization Using Geodesics in Statistical Manifolds
Reprinted from: Entropy 2015, 17(1), 304-345
http://www.mdpi.com/1099-4300/17/1/304 ............................................................................ 276

Luigi Malagò and Giovanni Pistone
Natural Gradient Flow in the Mixture Geometry of a Discrete Exponential Family
Reprinted from: Entropy 2015, 17(6), 4215-4254
http://www.mdpi.com/1099-4300/17/6/4215 ............................................................................ 320

Anass Bellachhab
Distributed Consensus for Metamorphic Systems Using a Gossip Algorithm for CAT(0) Metric Spaces
Reprinted from: Entropy 2015, 17(3), 1165-1180
http://www.mdpi.com/1099-4300/17/3/1165 ............................................................................ 361

Jaehyung Choi and Andrew P. Mullhaupt
Geometric Shrinkage Priors for Kählerian Signal Filters
Reprinted from: Entropy 2015, 17(3), 1347-1357
Jaehyung Choi and Andrew P. Mullhaupt
Kählerian Information Geometry for Signal Processing
Reprinted from: Entropy 2015, 17(4), 1581-1605

Youssef Bennani, Luc Pronzato and Maria João Rendas
Most Likely Maximum Entropy for Population Analysis with Region-Censored Data
Reprinted from: Entropy 2015, 17(6), 3963-3988
http://www.mdpi.com/1099-4300/17/6/3963 ................................................................. 414

Udo von Toussaint
General Hyperplane Prior Distributions Based on Geometric Invariances for Bayesian Multivariate Linear Regression
Reprinted from: Entropy 2015, 17(6), 3898-3912
http://www.mdpi.com/1099-4300/17/6/3898 ................................................................. 440

Geert Verdoolaege
A New Robust Regression Method Based on Minimization of Geodesic Distances on a Probabilistic Manifold: Application to Power Laws
Reprinted from: Entropy 2015, 17(7), 4602-4626
http://www.mdpi.com/1099-4300/17/7/4602 ................................................................. 455

Jun Zhang
On Monotone Embedding in Information Geometry
Reprinted from: Entropy 2015, 17(7), 4485-4499
http://www.mdpi.com/1099-4300/17/7/4485 ................................................................. 480

Takashi Takenouchi, Osamu Komori and Shinto Eguchi
Binary Classification with a Pseudo Exponential Model and Its Application for Multi-Task Learning
Reprinted from: Entropy 2015, 17(8), 5673-5694
http://www.mdpi.com/1099-4300/17/8/5673 ................................................................. 496
